Helping to
Win!

Helping to Win!

The Fundação Padre Félix works on a social development project. For this project, our team works everyday with several partners and services, including those related to areas such as education, health, youth, employment, habitation, disability, psychology, among others.

Our Little Winners

We also work in partnership with The Children and Youth Commission, the Aveiro's intervention project on parental education, and the social network: social intervention planning and quality of the council's social equipments.

Also, we offer an educational support for those children with learning difficulties, provided by retired teachers.

The Fundação Padre Félix, implanted on the very heart of S. Bernardo's community, seeks to develop new resources and capable responses to people's needs and participates on the community animation activities, as well.

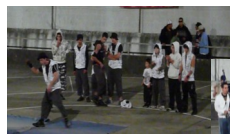

We also develop volunteering activities, specially with the youngsters, stimulating their sense of solidarity and social responsibility towards the community.

We like new challenges

Each year, we plan new thematic activities, involving all the community, with the help of the council and local partners, such as coffee-meetings, including social plays with the participation of the audience, discussing the role of each member in the family; meetings with immigrant and portuguese families: discussing differences about being a family in Portugal and in the country of origin, with typical gastronomy; meetings about learning difficulties and how to prevent and act before them; educational sessions about the environment; study journeys; a concert with immigrant and portuguese local bands, included in the events of the month related to the family and to the european year for intercultural dialogue.

Christmas Party

Concert Different Notes, One Melody

We are betting on professional training

The Fundação Padre Félix, with the help of the Professional Training Centre of Aveiro and a local institution, is offering professional training actions on different areas, such as nutrition, health care for elders, first aid care and domestic economy.

Next year, we intend to offer a more diverse set of trainings, improving the knowledge already acquired by some, and training others, who are searching for a new job, helping people to do a more qualified work.

1st. Aid Care and Nutrition
